Professional Summary

Aspiring AI/ML Engineer with hands-on experience in building applied machine learning and computer vision solutions using Python. Strong foundation in data preprocessing, feature extraction, and translating AI/ML concepts into real-world applications. Passionate about learning and applying AI systems at scale.

Education

Master Of Science In Data Science IIIT Hyderabad (IIIT-H) MSDS Program	2024 – Present Hyderabad
Bachelor Of Technology Malla Reddy Engineering College (MREC) Mechanical Engineering - CGPA (6.8)	2017 – 2021 Hyderabad
Board Of Intermediate Narayana Junior College Hyderabad MPC - CGPA (7.7)	2015 – 2017 Hyderabad
Secondary School Certificate Bhashyam High School SSC - CGPA - (8.2)	2014 – 2015 Hyderabad

Projects

AI-Driven Automated Code Review and Bug Detection

Tech: Python, NLP, Machine Learning, TensorFlow, Flask

- Built an AI-assisted code review system using NLP and ML to detect common bugs, indentation issues, and code-quality problems.
- Implemented preprocessing, heuristic checks, and exposed results through a Flask API for easy integration.

ASL Alphabet Recognition Using Hand Gestures

Tech: Python, OpenCV, MediaPipe, NumPy

- Developed a real-time ASL alphabet recognition application using hand landmark detection with MediaPipe.
- Processed landmark data and applied image-processing logic to classify A-Z gestures.

Sales Insights Dashboard – Python & Matplotlib

Tech: Python, Pandas, Matplotlib, Seaborn

- Built a sales analytics dashboard to analyze business performance and identify key sales trends.
- Cleaned and processed sales data using Pandas and created visual reports using Matplotlib and Seaborn to generate insights.

Skills

- Programming Language:** Python
- AI / ML:** Machine Learning Basics, Computer Vision, Feature Extraction, Model Inference Pipelines
- Libraries:** NumPy, Pandas, OpenCV, MediaPipe
- Data Analysis:** Data Preprocessing, Exploratory Data Analysis (EDA), Data Visualization
- Tools:** Jupyter Notebook, Git, GitHub, VS Code
